

## HOW?

- Questionnaire which is assessed with you in your home
- Three small devices, which measures your indoor climate
- Lung function test
- Optional extensive interview

## WHEN?

- August-September and February-April 2017/2018
- The devices will stay in your apartment for 14 days
- The questionnaire takes approx. 40 min. to fill out
- Optional later interview takes approx. 1,5 hours
- Lungfunction test takes 5 minutes
- **Booking via [revalue@ph.au.dk](mailto:revalue@ph.au.dk) or 9350 8723**

## WHY?

- Opportunity to get a unique insight into your own indoor climate and lunghealth
- Setting the standard for future renovation projects
- Participate in necessary research concerning indoor climate, health, perception and renovation
- A box of chocolate as thanks for your help
- Full confidentiality!

*We come from Aarhus University and the research project ReVALUE... May we kindly ask you about your health, your indoor climate and how you experience your apartment*

We look forward to talking with you!  
Kind regards Grethe, Charlotte & Stina
